# Hydroblast (HB2)

**Goggles**

**Series**

**Specification Sheet**

## **PRODUCT DESCRIPTION:**

MCR Safety's goggles are designed to provide solution-based eyewear protection. This brand is distinguished with application based, stylish design elements and superior coatings for work and play. The Hydroblast® HB2 goggle features a unique co-injected super soft TPR seal that allows for better and more comfortable fit. The low profile athletic design and 7-Point Ratchet action temple allow for all day comfort and adjustability. These goggles are indirect vented and dielectric which are often used in chemical environments. They available with adjustable hook and loop elastic strap or adjustable rubber strap. Other features include a dielectric construction, meaning that it contains no metal pieces. If you are looking for the best safety anti-fog goggles, choose from MCR Safety MAX6® coated options! Available with MAX6® anti-fog coating which provides 6 times better fog protection, or standard anti-fog coating.
