# LUMINATOR™

## Reflect With These

CK312 Gray Lens

CK310 Clear Lens

CK319 Indoor/Outdoor  
Clear Mirror Lens

Luminator™ reflective glasses provide greater safety, especially in dark or low light environments. The unique patented design integrates retro-reflective material into the temples for enhanced worker visibility.

What is retro-reflective? When light hits the Luminator™ temples, it reflects back exactly like a safety vest with reflective material. The workplace is a dangerous environment and you need to be seen to be safe. The soft “no slippin, better grippin” temples provide a secure and comfortable fit. Available in clear, gray, and indoor/outdoor lens options and feature a universal nose bridge. Luminator™ Reflective glasses will help you to be seen and safe.
